PROFILE

Software Engineer specializing in Flutter and full-stack development, with growing experience coordinating client projects end-to-end. Expert in Clean Architecture, BLoC state management, and backend integration using Spring Boot. Currently manage direct client relationships across multiple concurrent projects — gathering requirements, planning delivery, resolving queries, and ensuring valuable, on-time deployments — while expanding into DevOps and CI/CD automation for Flutter workflows.

EDUCATION

BE in Computer Engineering

CVM University | CGPA: 7.67/10.0

Sept 2021 – May 2025

PROFESSIONAL EXPERIENCE

Software Engineer (Flutter)

Full Stack Development Intern

Muster Dekho - Ahmedabad

July 2025 – Present

Jan 2025 – June 2025

- Maintained and enhanced 6+ production-level Flutter applications by following Clean Architecture principles using BLoC, Repository, and Datasource patterns.
- Implemented end-to-end features, including complex user flows, state management, API integration, and business logic across Customer, Service Partner, Admin, and Franchise apps.
- Integrated REST APIs using Swagger/OpenAPI generated models to ensure type-safe communication, handling file uploads, and ensuring smooth data flow.
- Optimized UI/UX implementation, resolving layout/overflow issues, creating responsive bottom sheets and dashboards, and ensuring a consistent experience across Android and iOS.
- Managed the end-to-end release lifecycle for Google Play Store and Apple App Store, resolving build/SDK issues and handling provisioning profiles.
- Collaborated in an Agile environment using JIRA for task tracking and PR management; tested applications using defined test cases during QA cycles.
- Coordinate directly with multiple clients across multiple concurrent projects — gathering requirements, planning execution, understanding needs, and resolving queries to ensure valuable delivery with each deployment.
- Currently manage 2 active clients in parallel: one with a portfolio of 5 apps and another with 2 apps plus an Admin panel, sharing regular progress summaries and prioritizing tasks based on their evolving requirements.

Software Development Engineer Intern

Bluestock - Remote

Dec 2024 – Jan 2025

- Developed responsive web interfaces and integrated RESTful APIs to fetch dynamic content, ensuring cross-device compatibility and clean UI design.

PROJECTS

LinkSphere - Professional Networking Platform

Tech: Flutter, Spring Boot, REST APIs

- Designed a professional networking platform enabling users to connect and share career updates.
- Implemented secure Authentication & User Management systems for seamless registration and login.
- Built a responsive frontend using Flutter communicating with a robust Spring Boot backend.

GK Store - E-commerce App

Tech: Flutter, Spring Boot, MySQL, Provider

- Developed a full-featured e-commerce solution with cart management, order placement, and inventory control.
- Optimized MySQL database schemas and integrated REST APIs for real-time product synchronization.

TECHNICAL SKILLS

Languages

Dart, Java, JavaScript, SQL, HTML/CSS

Mobile & Frameworks

Flutter, React.js, Spring Boot, Node.js

Architecture & State

Clean Architecture, MVVM, BLoC/Cubit, Repository Pattern, Provider

Backend & Cloud

REST APIs, Swagger/OpenAPI, Firebase (Auth/Notifications), MySQL, MongoDB

DevOps & Tools

CI/CD Workflows, Git, Postman, App Store Connect, Google Play Console, JIRA

Client & Project Coordination

Requirement Gathering, Sprint Planning, Stakeholder Communication, Task Prioritization, Query Resolution
